Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 8-14, 38-43 and 46, drawn to an apparatus (an display system for analyzing medical images), classified in class 600, subclass 437.
- II. Claims 108-113, drawn to an apparatus (an display system to simplify concurrent review of a film image with a first and second review set-up phases, classified in class 715, subclass 704.
- III. Claims 89, 100 and 114-117, drawn to a method (setting up a system to enable displaying digitized medical images), classified in class 715, subclass 765.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I/II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially

different apparatus such as a small size personal digital assistant (PDA) apparatus that has customizing layout of the graphical icons. In addition, the apparatus as claimed can be used to practice another and materially different process such as a process of detecting a frame number of the filmed image to be reviewed by a film viewer apparatus.

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, the invention of Group I has separate utility such as an display system for analyzing medical images without a first and second film review set-up phases, and vice versa. In other words, each on the inventions recited in Group I and Group II is separately usable in a system not having the other. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their recognized divergent subject, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the response to this requirement to be completed must include an election of the invention to be examined even though the requirement is traversed (37 C.F.R. 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to LUU MATTHEW whose telephone number is (571) 272-7663. The examiner can normally be reached on Flexible Schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JACK KEITH can be reached on (571) 272-7663. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
